

# FLAP DISCS

# CAST-IRON FOR HEAVY-DUTY WORK!

## cibo flap discs

Flap discs are used for heavy and fast stock removal with a decent finish. Cibo offers you a range of specific flap discs with very pronounced characteristics. Provided the choice is right, with us every operator will have the ideal disc, perfectly adapted to its specific application.

### Cibo's winning hand:

- own production
- strong price/performance ratio
- available from stock\*

\* FOV115 and FOZ115 are available on request.

Our flap disc guide leads you smoothly through the choice towards your ideal flap disc. Consult it at [www.cibo.be/en/flap-disc-selector](http://www.cibo.be/en/flap-disc-selector)

## STANDARD

With the Standard line, Cibo offers you flap discs at an extremely competitive price. The specially developed cotton backing ensures a constant release of new abrasive grain, which makes for an excellent performance of the disc. (machine: from 750W)

extremely competitive price

perfect on stainless steel

## HIGH PERFORMANCE

100% zirconium grains and a poly-cotton backing guarantee a very high and constant stock removal from beginning to end, and with an extremely long service life. The High Performance line is the perfect choice for anyone who wants intensive, cost- and time saving steel stock removal. (machine: from 1200W)

The best disc for

## TOP

stainless steel and steel!

This ceramic flap disc on a poly-cotton backing is the best disc for heavy and fast stock removal. Alongside an unusually long service life, the disc is very comfortable to work with, because the uniform wear pattern of the flaps ensures that the working pressure on the disc remains constant. A 1200 Watt motor is an absolute must.
