#### Product

Identification: FX87 – ceramic abrasive cloths in belts, sheets, rolls  
Application: Ceramic coated abrasive material used for sanding and finishing operations of various materials, including metals.

#### Imported notice

Coated abrasives are inert products which do not create any risk when handled or stored. When used on grinding machines they require specific measures to protect the operators. During the grinding operation 90% or more of the particulates of the dust come from the material being ground and, for wet grinding, from aerosols generated by the grinding fluid. Specific attention must therefore be given to the nature of the part and of the fluid and the appropriate protection devices must be installed.

### CHAPTER 2: Hazards identification

#### 2.1 Classification

Not applicable

Abrasives are articles and not dangerous substances or mixtures according to Regulation (EC) N° 1272/2008.  
See also section 8 and 16.

#### 2.1 Label elements

Abrasives are articles and not dangerous substances or mixtures and therefore no labelling is required according Regulation (EC) N° 1272/2008.

#### 2.1 Other hazards
