# CIBO BRISTLES

Cibo Bristles are innovative, thermoplastic-bonded abrasive brushes. They are specially designed to finish irregular or hard-to-reach surfaces quickly, safely and efficiently.

## UNLIKE TRADITIONAL STEEL WIRE BRUSHES THEY:

- do not scratch the underlying material
- do not cause any flying wire particles (which is safer for the user)
- give a uniform finish even on complex shapes

# WHY CHOOSE CIBO BRISTLES?

## FLEXIBLE & SOFT ACTION

Adapts effortlessly to complex shapes

## COOL GRINDING

Prevents distortion and discolouration

## UNIFORM FINISHING

Ideal for CNC machines

## SAFER THAN STEEL WIRE

No flying wires

## DURABLE & HARD-WEARING

Long lifespan meaning less refills

## APPLICATIONS

- ➔ Remove weld discolouration
- ➔ Removing mill scale
- ➔ Cleaning of hard-to-reach surfaces
- ➔ Deburring aluminium profiles
- ➔ Cleaning or deburring threads

# CUP BRUSHES WITH QUICK CHANGE CONNECTIONS

For those for whom speed and precision are important, use the Cibo Cup Brushes with Lockit® Quick Change connection.

Ideal applications include deburring and spot repair, such as lacquer removal.

## LOCKIT® CIBO BRUSH CUPS

Easy to change without tools.

Perfect for small hard-to-reach areas.

Sturdy at high speeds.

# CUP BRUSHES FOR ANGLE GRINDERS WITH M14 THREAD

Cibo's Bristle cup brushes are the solution for efficient paint and coating removal.

Thanks to their sturdy construction and built-in M14 thread, they are directly mountable on any standard angle grinder – without any additional flange or adapter.

## M14 CIBO BRUSH CUPS

Specially developed for paint removal.

Quick assembly.

Robust & safe alternative to wire.

## FREQUENTLY ASKED QUESTIONS - FAQ

**Can I use them on sensitive materials such as aluminium or stainless steel?**

Absolutely. Their cool abrasive action and fine grit options (up to P400) make them perfect for materials prone to discolouration or distortion.

**Are refill packs available?**

Yes, currently we have refill packs available in the 150mm bristles range. Take a look at page 7 for more detail.

**Are they compatible with my CNC machine?**

Yes, they are ideally suited for CNC use thanks to their availability in fixed sizes and grains.

**How long do the brushes last?**

Cibo Bristles are very hard-wearing. Their lifespan depends on the application, but they last much longer than conventional brushes due to their durable construction.
