

MACHINE GUIDE

ABRASIVE BELT MATERIALS

We have selected our top 6 abrasive materials to suit most applications. Can't see a material suitable? Contact your local distributor who can advise alternative options.

	code	grit type	backing	💧	grit range
	FX87	ceramic	polyester	💧	36-40-60-80-100-120
<p>Premium performance product on stainless steel & aluminium. The heavy duty backing guarantees a high cut rate + lifetime.</p>					
	FF87	ceramic	polyester / cotton		60-80-100-120-150-180-220-320-400
<p>Ideal finishing belt on stainless steel & aluminium. The flexible backing means FF87 follows curves such as tubular elbows with ease.</p>					
	HZ72	zirconia	polyester	💧	24-36-40-50-60-80-120
<p>Ideal for demanding applications on stainless steel, aluminium, metal, and non-ferrous metals with a high cut rate.</p>					
	VT	aluminium oxide	polyester / nylon web	💧	RC1 (80-150), RC2 (150-180), RC3 (220-320)
<p>Designed for decorative finishing, VT material leaves a burr free, soft satin finish on stainless steel and aluminium. Works well at low pressure.</p>					
	237AA	Trizact™	cotton		A160-A100-A80-A65-A45-A30-A16-A6
<p>Ideal for surface preparation prior to mirror polishing. 237AA is designed for high accuracy surface finishing of stainless steel & exotic alloys.</p>					
	337DC	Trizact™	cotton		A300-A160-A100-A65-A45
<p>A sister product to 237AA but with a faster cut rate & longer life. The most popular product for satin grain finishing of stainless steel.</p>					

TEX FLAP WHEELS

Applications include: cleaning, satinising, applying a decorative finish to stainless steel (+ aluminium & brass) and the removal of rust & oxidation.

FMTA - 19MM KEYWAY

dia	widths	grit range
100	50 & 110	CP,80,180,280,400,600

FMTM - M14 THREAD

dia	widths	grit range
120	50 & 110	CP,80,180,280,400,600

COMBI FLAP WHEELS

Applications include: satin finishing, graining, removal of rust & oxidation.

The abrasive cloth improves durability on edges.

FMCA - 19MM KEYWAY

dia	widths	grit range
100	50 & 100	80,180

FMCM - M14 THREAD

dia	widths	grit range
120	50 & 110	80,180

CERAMIC COMBI FLAP WHEELS

Applications include: grain finishing & damage removal.

Top tips: use at a high pressure to cut, low pressure to finish.

The high performance ceramic cloth gives extra cut.

FMCAC - 19MM KEYWAY

dia	widths	grit range
100	50 & 100	60

FMCMC - M14 THREAD

dia	widths	grit range
120	50 & 110	60

Nicknamed the 'Ginger Ninja', ceramic combi wheels last and last...

UNITISED FILLET WELD DISCS

S-LINE

Density range: 5-6-7

Recommendation: SA/5 - removes weld colour and leaves a pre-polished finish

S-LINE +

Density range: 2SF-3SF-6SF

Recommendation: SA/2SF - for deburring, blending and leaves a pre-polished finish.

M-LINE

Density range: 5-6-7-8

Recommendation: MA/8 - more aggressive than SA, MA/8 is ideal for blending stainless tig fillet welds.

M-LINE +

Density range: 2AM-3AM-8AM-8AC

Recommendation: MA/2AM - similar to SA/2SF but leaves a fine satin finish.

F-LINE

Density range: 3-4-5

Recommendation: FA/3 - perfect for weld colour removal & cleaning. Leaves a fine satin finish.

T-LINE

Density range: 10

Recommendation: TA/10 - the most aggressive disc. It is ideal for dressing and finishing heavier tig welds.

G-LINE

Density range: 7

Recommendation: GA/7 - 2 materials combined in 1 disc. MA aggression + SA fine finishing = GA Combi.

X-LINE +

Density range: 3AM-5AM-7AM

Recommendation: XA/5AM - removes tig welds, and blends smoothly.

Cibo Size Codes:

T30 = 150mm x 3mm (25.4mm centre hole)

T31 = 150mm x 6mm (25.4mm centre hole)

T32 = 150mm x 12mm (25.4mm centre hole)

T33 = 150mm x 25mm (25.4mm centre hole)

RCD FLAP DISCS

Grind and finish in one! Proven to improve quality, half production time and reduce costs.

RCD/VF - VERY FINE

For detailed sanding on stainless & aluminium.
Available in 115 & 125mm.

RCD/ME - MEDIUM

For sanding tig welds on stainless steel tubes.
Available in 115 & 125mm.

RCD/CO - COARSE

For sanding heavier tig welds on stainless tubes.
Available in 115 & 125mm.

RCD/UC - ULTRA COARSE

For sanding aluminium mig welds.
Available in 115 & 125mm.

FLAP DISCS

FNC - CONICAL ZIRC

Great price-performance ratio when grinding.
Available in 115 & 125mm. P40, P60 & P80.

FPC - CONICAL CERAMIC

Longer lasting, faster cutting.
Available in 115 & 125mm. P40, P60 & P80.

FOV - EXTENDED CERAMIC

Flexible edge for grinding and shaping fillet welds.
Available in 115 & 125mm. P40, P60 & P80.

SAG - UNITISED S-LINE

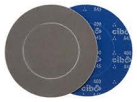

For scratch removal, pre-polishing & deburring.
Available in 115 & 125mm. Densities 5, 6, 7.

VELCRO GRIP DISCS

LCGR - CERAMIC

Very well suited to working on stainless steel.
Available in P36, P40, P60, P80, P100 & P120.

237GR - TRIZACT™

Makes it easy to mirror polish sheet & strip metal.
Available in A160(P120), A100(P220), A80(P240), A65 (P280), A45(P400), A30(P600), A16(P1400), A6(P2000).

FINITUBE TUBE POLISHER

The number 1 tube polisher on the market for tackling curves and bends! The Finitube offers up to a 270° reach for many tube diameters, expandable to 360° in one additional operation.

KEY FACTS

Power – 1700w

RPM – 900-2,810

Standard belt size – 675mm x 40mm

FINIMASTER KEYWAY DRUM SANDER

The original Finimaster machine that fits various wheels & sleeves via a 19mm keyway fixing. Generates a uniform finish, especially on flat surfaces.

KEY FACTS

Power - 1700w

RPM - 700-3,000

Attachment - 19mm keyway

Standard sleeve size - 293mm x 100mm

SCM sleeve size - 305mm x 100mm

FINIPOWER PLUS VARIABLE SPEED GRINDER (SMFP/PLUS)

Given its wide rpm range, this angle grinder is ideal for all your sanding and grinding work. Combine with Cibo's Unitised range, flap discs and RCD finishing discs.

KEY FACTS

Power - 1700w
RPM - 2,000-7,600
Max disc diameter - 125mm

FINIPOWER VARIABLE SPEED GRINDER (SMFP)

Looking for a powerful angle grinder for all your polishing work? Then choose this slow-running Finipower. Adjust the rpm to make the machine suitable for both sanding and polishing.

KEY FACTS

Power - 1700w
RPM - 700-3,000
Max disc diameter - 125mm

TIME SAVING KITS

Contain all the products and information you need to complete a full finishing process.

SATIN FINISHING KITS
